

More PhreakNIC 10 notes

Riskable of the HackerPimps had some favorable things to say about us. They put on a very good presentation on lockpicking (which I missed unfortunately) and were cool guys to talk to. They had a very nice collection of high security Master Locks for the competitions. Last but not least was Sysmin's S&G 831B munitions padlock which is about as good as it gets when it comes to padlock security. (For those that may not be aware, we also make a tech show called "The Packet Sniffers" available on public access in Bloomington and also online.)
