

New Designs!

We are working on several new and exciting projects right now. DEFCON is closing in soon, come to the lockpick village in the skybox area and say hello. We'll be the drunk fools next to all the other drunk tools. In the works:

- Logistics for moving 130 pounds of wood and lock to DEFCON
- Possibly a demo on some new bypass techniques
- Site Redesign with logos and corresponding swag that you can buy!
- We've got some new contacts so we'll also be fabricating some new pick designs soon.
